If using Glacier Pro Plow System with tracks, Track Plow Extension is required (2889267)

For year-round use, Polaris recommends the use of Intake Update Kit (2880673) on any RANGER XP 1000 '17, RANGER XP 1000 CREW '14-18 with tracks installed. To keep intake system working optimally, this kit pre-filters out fine snow and dust.

#### 1 INDUSTRY-FIRST FLEX-TRACK DESIGN

Front-mounted tracks with flexible sides and a slight inward curve allow for stable handling, a more comfortable ride and precise steering over long-distances or extended working hours.

#### 2 HIGH-DENSITY TYRE WITH ADJUSTED SHAPE

With puncture-proof tyres that reduce friction and wear, the Prospector Pro 2.0 Tracks delivers trouble-free performance.

Confidently take on bumps and obstacles with 8" high-density tracks.

#### 3 LIGHTWEIGHT POWDER COAT STEEL FRAME

Proven geometry to improve durability and deliver capability in all conditions throughout the life of the tracks.

A lighter frame provides more flotation to stay on top of the snow and allows the tracks to easily shed the elements they encounter.

#### 4 TANDEM STABILIZER

The bolt-on, tandem mid-roller wheel provides a smoother ride by absorbing shocks.

#### 5 BEARING HOUSING

Outer seals and stainless steel sleeves allow stronger bearing durability and greater reliability.

#### 6 WHEEL CAP & SEAL

A fitted wheel cap with bladder effect eliminates water absorption due to temperature variation. Ride in snow or mud without worrying about track maintenance.

## FEATURES & BENEFITS

ALL POLARIS ENGINEERED WINCHES COME WITH:

- ✓ INTEGRATED WIRING, MOUNT, PREASSEMBLED
- ✓ HOOK WITH STRAP
- ✓ CUT STEEL GEARS & SEALED DRIVETRAIN
- ✓ SEALED PERMANENT MAGNET MOTOR

Retrieve cable 5x as fast as standard mode on other Polaris winches. Get back to riding or complete your task quicker.

1. Set winch dial to N (Neutral) to manually pull the rope out and secure the hook to your anchor point
2. Set winch dial to L (Low) for maximum pulling power while winching your load
3. Set winch dial to H (High) for retrieving the rope 5x faster with Rapid Rope Recovery

Auto Stop technology protects and extends the life of your winch by automatically stopping the winch at the end of pull to prevent over-spooling. While plowing, it prevents the plow frame from bending by stopping the winch once the plow has been lifted.

With its lightweight, yet extremely strong, design and superior flexibility, this 15.2 m long synthetic rope is easy to handle and can stand up to any tough job.

This convenient remote operates your Polaris winch wirelessly from within 15.2 m of the vehicle. Operate your winch safely outside your vehicle while on the job site or trails.
