

Husqvarna TC 100i

Cut larger areas and get a nice, tidy lawn with the compact TC 100i garden tractor, featuring an efficient collecting system. The compact design allows effortless navigation in narrow passages and facilitates storage when not in use. Even in entry level segment, the product offers a high-quality impression and has durable and thought-through touchpoints with a modern look and feel. Experience reliable electric power, excellent cutting results, and the dynamic mowing function that automatically adjusts the power consumption based on the mowing conditions. This ensures consistent cutting performance and saves energy when possible. Furthermore, the runtime can be extended using the savE™ mode, also enabling quieter mowing.

The TC 100i has ergonomic, easy-to-reach levers and controls for optimal convenience and a comfortable, spacious operator's position. To make the ride even more comfortable, the noise level is very low during transport mode. In addition, the electric drive and few service points almost make the tractor maintenance free. The towing hook makes it possible to use the tractor for several purposes with the help of tow behind attachments.
