

WINCH KIT

P/N 2885095; 2885096; 2889474

BEFORE YOU BEGIN

Read these instructions and check to be sure all parts and tools are accounted for. Please retain these installation instructions for future reference and parts ordering information.

APPLICATION

Verify accessory fitment at www.polaris.com.

REQUIRED SOLD SEPARATELY

Only parts for installation of the Winch Kit are included. For complete installation, the following additional kit is required (sold separately):

- *Front PULSE® Bar And Harness* (if not factory equipped), P/N 2889185

KIT CONTENTS

3500HD P/N 2885095

HARNESS DETAIL

ACCESSORY HARNESS WINCH CONTROL SPLITTER

REF	PART DESCRIPTION	CONNECTS TO
4M	Connector, Sealed, Male	Main chassis harness
4F	Connector, Sealed, Female	Open — connects to accessory wired remote, Polaris p/n 2889600
12F	Connector, Female	Winch Switch

Example: 16F = 16 pin, Female / 16M = 16 pin, Male (Male terminal fits inside female terminal)

ACCESSORY HARNESS WINCH

REF	PART DESCRIPTION	CONNECTS TO
8F	Connector, Sealed, Female	Winch Control
2F	Connector, Sealed, Female	Auto Stop
3M	Connector, Sealed, Male	RC Harness
4M	Connector, Sealed, Male	Chassis Harness
4F	Connector, Sealed, Female	Contactora
8F	Connector, Sealed, Minifuse	Fuse Block

Example: 16F = 16 pin, Female / 16M = 16 pin, Male (Male terminal fits inside female terminal)

TOOLS REQUIRED

- Safety Glasses
- Drill
- Drill Bit
- Socket Set, Hex Bit, Metric
- Socket Set, Metric
- Socket Set, Torx® Bit
- Torque Wrench
- Wrench Set, Metric

IMPORTANT

Your Winch Kit is exclusively designed for your vehicle. Please read the installation instructions thoroughly before beginning. Installation is easier if the vehicle is clean and free of debris. For your safety, and to ensure a satisfactory installation, perform all installation steps correctly in the sequence shown.

INSTALLATION INSTRUCTIONS

VEHICLE PREPARATION

GENERAL

1. Park vehicle on a flat surface.
2. Shift vehicle into PARK.
3. Turn key to OFF position and remove key.

BATTERY DISCONNECT

1. Counter-hold nut and remove bolt from negative battery terminal to remove negative (black) battery cable.

HOOD REMOVAL

1. Turn two quarter-turn fasteners to unlock position to remove hood from vehicle.

FRONT BUMPER REMOVAL

CAUTION

Bumper weighs approximately 31 lbs (14 kg). Failure to adequately support bumper during removal may result in personal injury or damage to equipment.

1. Remove and keep nut (B) and bolt (A). Repeat for opposite side.

NOTICE

Right side detail shown; left side similar.

2. Support bumper, remove and keep nut (D) and bolt (C). Repeat for opposite side.

NOTICE

Right side detail shown; left side similar.

ACCESSORY INSTALLATION

INSTALL 3500 FAIRLEAD

1. Put mounting plate ⑤ in place behind bumper. Put fairlead ② in position and install three screws ⑨. Torque to specification.

TORQUE

Fairlead Screws ⑨:
40 ft-lbs (54 N·m)

INSTALL 4500 HD FAIRLEAD

1. Put mounting plate ⑤ in place behind brush guard cover. Put fairlead ② in position and install three screws ⑨. Make sure to feed fairlead wiring through opening in bumper. Torque to specification.

NOTICE

Fairlead wiring not shown.

TORQUE

Fairlead Screws ⑨:
40 ft-lbs (54 N·m)

WINCH INSTALLATION

1. Put winch assembly ③ in position on bumper. Align mounting holes with existing holes in bumper.

NOTICE

Make sure winch is installed with the gear selector on driver side of vehicle.

2. Install screws ⑨ into mounting plate ⑥. Make sure winch assembly ③ sits flush on bumper. Torque to specification.

IMPORTANT

When installing 4500 HD winch, make sure to route fairlead wires to the right, over the top of the winch motor.

IMPORTANT

Make sure to feed winch cable through opening in bumper and through fairlead.

TORQUE

Winch Mounting Screws ⑨:
40 ft-lbs (54 N·m)

3. Install bumper on vehicle using kept screws and nuts (upper nut ⑧ not shown). Torque to specification.

NOTICE

Make sure wires do not get pinched during bumper installation.

TORQUE

Bumper Mount Nuts ⑧ and ⑩:
30 ft-lbs (41 N·m)

4. Route winch power wires under radiator and fan assembly.

- Route winch power wires under frame assembly, then up behind PULSE® board. Install push pin clips into frame as shown.

NOTICE

PULSE® board partially hidden to show installation.

- Install push pin into back side of PULSE® board in hole next to hole 11.

- Route wires through opening in PULSE® board.

- Connect the winch power wire (A) and winch ground wire (B) to PULSE® bar as shown. Torque to specification.

TORQUE

PULSE® Bar Connections (A) and (B):
44 in-lbs (5 N·m)

INSTALL WINCH CONTROL SPLITTER

- Install winch control splitter harness (3) on PULSE® board. Install push pin connectors in positions 1, 2, and 3. Connect 4M to main chassis harness.

2. Install harness in clip located behind PULSE® bar. Route inside vehicle along existing wiring and connect **4F** to vehicle accessory power.

3. Route wiring along rear of compartment. Secure in positions shown. Route inside vehicle along existing wiring and connect **12F** to winch switch.

INSTALL 4500 HD WIRELESS AUTO STOP RECEIVER

1. Put wireless autostop receiver ① in position on mounting surface located in top right of the Pulse panel. Install using screws ⑯ and tighten until secure.

INSTALL 4500HD ACCESSORY HARNESS

1. Install push pin clip attached to fuse block in location J in Pulse panel. Route 4500HD Accessory Harness ⑮ along panel installing in sequence 12, 11, 8, 7, 5, 4 and 1. Connect **8F** to wireless receiver ①. Connect **2F** to winch harness.

2. Connect **4F** to winch. Connect **4M** to main chassis harness. Connect **3M** to Ride Command (if equipped).

INSTALL 4500HD REMOTE CONTROL

1. Place remote control mount ⑫ in location shown.

2. Locate and drill two holes. Use remote control mount ⑫ as a template to mark the holes.

3. Install remote control mount ⑫ using two screws ⑭.

4. Put remote control ⑪ in remote control mount ⑫.

INSTALL 3500 HOOK AND BUMPER

1. Install jounce bumper ⑦ onto winch cable.

2. Install winch hook ⑧ onto winch cable using pin ① and hairpin clip. Bend ends of clip around pin to secure.

INSTALL 4500HD HOOK MAGNET AND BUMPER

1. Install jounce bumper ⑦ and Auto Stop magnet ⑰ on winch cable.

2. Install winch hook (8) onto winch cable using pin (A) and hairpin clip. Bend ends of clip around pin to secure.

HOOD INSTALLATION

1. Align hood with vehicle and turn two quarter-turn fasteners to lock position to install hood.

VEHICLE REASSEMBLY

BATTERY CONNECT

1. Install negative (black) battery cable(s) to negative battery terminal with retained hardware. Counter-hold nut and torque one bolt to specification.

TORQUE

Battery Terminal Bolt:
62 in-lbs (7 N·m)

OPERATION

1. For winch operation procedures see Winch Guide included in kit.

INSTRUCTION FEEDBACK FORM

A feedback form has been created for the installer to provide any comments, questions or concerns about the installation instructions. The form is viewable on mobile devices by scanning the QR code or by clicking [HERE](#) if viewing on a PC.
